Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8, 22, 29 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Hashimoto et al. (5,632,002).

As to claim 8, Hashimoto teaches a speech recognition interface system for enabling a speech control of a plurality of application programs executed on a computer, comprising: speech recognition means for carrying out a speech recognition processing for a speech input made by a user to obtain a recognition result; program management means for managing program management data indicating a speech recognition interface function required by each application program; and message processing means for exchanging messages with said plurality of application programs in order to specify an appropriate recognition vocabulary to be used in the speech recognition processing of the speech input to the speech recognition means, and to transmit the recognition result for the speech input obtained by the speech recognition means by using the appropriate recognition vocabulary (Col.3, lines 35-50), where before the pattern matching is carried out the message processing unit inquired as to which dictionary is selected and thereby designated for matching the input (Col.11, lines 44-50).

Claims 22, 29 and 31 are analogous to claim 8 and are rejected by Hashimoto for the foregoing reasons.

Response to Arguments

Applicant's arguments with respect to claims 8, 22, 29 and 31 have been considered but are moot in view of the new ground(s) of rejection.
